More Information: Visit http://clear.uconn.edu/projects/cri

Data source: Spatial interpolation of airborne LiDAR data collected in 2000. These elevation data are intended for research, education and demonstration purposes only. They have a horizontal resolution of 10 feet and a vertical resolution of 1 foot. The LiDAR data from which the elevation surface was interpolated had a horizontal spacing of generally 20 feet.

These maps are intended for general information and planning purposes only. They contain no authoritative positional information.
